

Science Chunks: Matter Sample Packet

Teach your students the basics of matter in bite-sized chunks. The following sample packet includes most of the first lesson of the *Science Chunks: Matter* digital unit study. You will see:

- ✓ The Introduction (*beginning on p. 4*)
- ✓ The Lesson (*beginning on p. 8*)
- ✓ The Lapbooking Templates (*beginning on p. 11*)
- ✓ The Notebooking Templates (*beginning on p. 14*)

If you have questions about what you see, please let us know by emailing support@elementalscience.com. To get started, head to:

A Peek Inside a Science Chunks Unit

4

1. Lesson Topic

Focus on one main idea throughout the week. You will learn about these ideas by reading from visually appealing encyclopedias, recording what the students learned, and doing coordinating hands-on science activities.

2. Information Assignments

Find two reading options—one for younger students, one for older students, plus optional library books.

3. Notebooking Assignments

Record what your students have learned with either a lapbook or a notebook. The directions for these options are included for your convenience in this section along with the vocabulary the lesson will cover.

4. Hands-on Science Assignments

Get the directions for coordinating hands-on science activities that relate to the week's topic.

5. Lesson To-Do Lists

See what is essential for you to do each week and what is optional. You can check these off as you work through the lesson so that you will know when you are ready to move on to the next one.

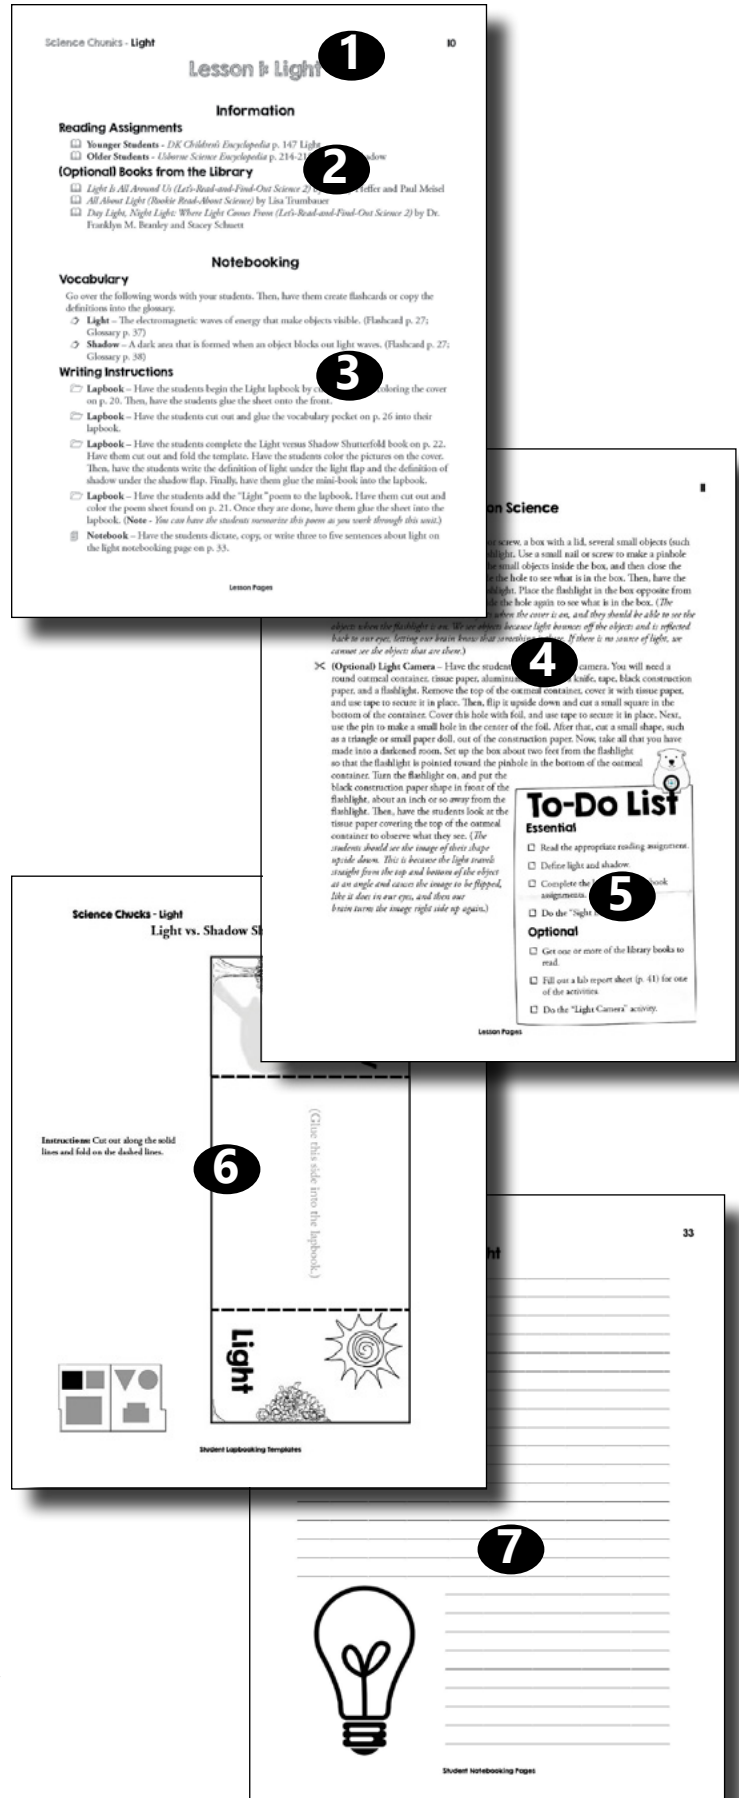

6. Lapbook Templates

Get all the information you need to create a lapbook on the subject.

7. Notebook Templates

Have all the sheets you need to create a notebook on the subject, including a glossary for the vocabulary terms.

In the appendix you will find a blank activity sheet, a blank lab report sheet, and a review sheet (or quiz).

Unit Introduction

Science Chunks - Matter is a unique and versatile unit study that leads you through a survey of matter. It is designed to be a gentle approach to homeschool science based on the Unit Study method suggested in *Success in Science: A Manual for Excellence in Science Education* by Bradley and Paige Hudson. This study can be used as a stand-alone unit for elementary science.

What Is Included in This Unit

Science Chunks - Matter includes the three keys to teaching science. With each lesson you will be doing the following:

- ✓ Listening to (or reading) **scientific information** from visually appealing encyclopedias
- ✓ Dictating (or writing down) what the students have learned and seen using **lapbooking or notebooking**
- ✓ Watching (and doing) **hands-on science** through a variety of science activities

Here is how this works for a lesson.

Section 1 - Information

The elementary student is an empty bucket waiting to be filled with information, and science-oriented books are a wonderful way to do that. These books can include age-appropriate children's science encyclopedias, living books for science, and/or children's nonfiction science books.

In this program, the reading assignments and additional books scheduled in the lesson fulfill this component. The reading assignments are broken for you into two levels: younger students (1st to 3rd grade) and older students (4th to 6th grade).

Our idea is that you will read these selections with your students, pausing to ask questions or discussing the information once you are done reading.

Section 2 - Notebooking

The purpose of the notebooking component for elementary science education is to verify that the students have placed at least one piece of information into their knowledge bucket. You can use notebooking sheets, lapbooks, and/or vocabulary words to fulfill this requirement.

In this program, we have included two writing options, a lapbook and a notebook, for you to use with your students. In the lapbook section, you will find all of the templates and pictures you will need to complete a lapbook on matter. In the notebook section, you will find all the pages you need to create a simple notebook on matter, including notebooking sheets and a glossary.

Section 3 - Hands-on Science

Scientific demonstrations and observations are meant to spark students' enthusiasm for learning science, to work on their observation skills, and to demonstrate the principles of science for them. This component of elementary science education can contain scientific demonstrations, hands-on projects, and/or nature studies.

In this program, the coordinating activities at the end of each lesson fulfill this section of elementary science instruction. If you would like to record what you have done, you can use one of the templates in the appendix pp. 40-41.

What You Need in Addition to This Guide

Books Scheduled

The following books are what we used to plan the reading assignments for this unit:

-  **Younger Students** - *Chemistry: Getting a Big Reaction (Basher Chemistry)*
-  **Older Students** - *Usborne Science Encyclopedia*

However, you could certainly use the encyclopedias you already have on hand or books from the library. Simply look up the topic assigned for the day, read about it, and complete the section in your lapbook.

You will need also simple craft supplies and other science materials—see a complete list of essential items on p. 8.

How This Unit Works

We have included a to-do list with each lesson to give you an idea of what is essential and what is optional. There are several ways you can schedule this unit. Here is a quick look at a few of the options.

Possible Schedules for Your Week

- **One Day** – You can set aside about an hour to an hour and a half each week to complete all the essential tasks in one day.
- **Two Days** – You can set aside about 30 to 40 minutes twice a week to complete all the essential tasks, plus a few more, in two days. On the first day, you can complete the reading assignments and either the lapbook or notebook assignments. On the second day, you can complete the coordinating activity and the vocabulary assignments as well as read any library books.
- **Three Days** – You can set aside about 30 minutes three times a week to complete all the essential tasks, plus a few more, in three days. On the first day, you can complete the reading assignments and either the lapbook or notebook assignments. On the second day, you can complete the coordinating activity and write a lab report using one of the templates. On the third day, you can do the vocabulary assignments as well as read any library books.

- **Four Days** – You can set aside about 20 to 30 minutes four times a week to complete all the essential tasks, plus a few more, in four days. On the first day, you can complete the reading assignments and either the lapbook or notebook assignments. On the second day, you can complete the coordinating activity and write a lab report. On the third day, you can do the vocabulary assignments as well as read any library books. On the fourth day, you can do the optional coordinating activity as well as read any library books.

If you choose to complete one lesson per week, this unit will take you four weeks to complete.

Final Thoughts

Read Further

Last Words

As the author and publisher of this curriculum, I encourage you to contact me with any questions or problems that you might have concerning *Science Chunks - Matter* by emailing us at support@elementalscience.com. I, or a member of our team, will be more than happy to answer them as soon as we can. I hope that you will enjoy creating memories using *Science Chunks - Matter*!

~ Paige Hudson

Materials List

Lapbook Materials

You will need the following materials to complete the lapbook:

- ✂ 2 Sheets of 8 ½" by 11" card stock OR 1 file folder
- ✂ Colored pencils or crayons
- ✂ Markers for decorating the cover
- ✂ Glue stick
- ✂ Scissors
- ✂ Stapler

Notebook Materials

You will need the following materials to assemble the notebook:

- ✂ Hole punch and 3 brad fasteners or string OR
- ✂ Staples

Coordinating Activity Materials

You will need the following materials to complete the essential coordinating activities:

- ✂ **Lesson 1:** 3 Balloons, Water, Ice
- ✂ **Lesson 2:** Orange Juice, Cup
- ✂ **Lesson 3:** 3 Toothpicks, Dish Soap, Bowl, Water
- ✂ **Lesson 4:** 2-Liter soda bottle, Quarter, Water

Lessons

Lesson 1: States of Matter

Information

Reading Assignments

 **Younger Students** - *Basher Science Chemistry* p. 8 Solid, p. 10 Liquid, p. 12 Gas

 **Older Students** - *Usborne Science Encyclopedia* pp. 16-17 Solids, Liquids, and Gases

(Note - There is also a fourth state of matter, plasma, which is a bit more abstract. It consists of atoms that have been split by high heat or electricity. Since it is difficult for students to be able to visualize plasma, we have left this information out for their first look at the different states of matter.)

(Optional) Books from the Library

 *What Is the World Made Of? All About Solids, Liquids, and Gases (Let's-Read-and-Find Out About Science)* by Kathleen Weidner Zoehfeld and Paul Meisel

 *Solids, Liquids, And Gases (Rookie Read-About Science)* by Ginger Garrett

 *States of Matter: A Question and Answer Book* by Fiona Bayrock and Anne McMullen

Notebooking

Vocabulary

Go over the following words with your students. Then, have them create flashcards or copy the definitions into the glossary.

 **States of Matter** – The different forms in which a substance can exist: solid, liquid, and gas. (Flashcard p. 27; Glossary p. 37)

 **Volume** – The space occupied by matter. (Flashcard p. 27; Glossary p. 38)

Writing Instructions

 **Lapbook** – Have the students begin the Matter lapbook by cutting out and coloring the cover on p. 20.

 **Lapbook** – Have the students complete the States of Matter Cut-flap Book on p. 22. Have them cut out and fold the template. Have the students color the pictures on the cover. Then, have the students write the definition for solid, liquid, and gas on the inside. Finally, glue the flapbook into the lapbook.

 **Lapbook** – Have the students cut out and glue the vocabulary pocket on p. 26 into their lapbook.

 **Lapbook** – Have the students add the “States of Matter” poem to the lapbook. Have them cut out and color the poem sheet found on p. 21. Once they are done, have them glue the sheet into the lapbook. (Note - You can have the students memorize this poem as you work through this unit.)

-  **Notebook** – Have the students dictate, copy, or write three to five sentences about solids, liquids, and gases on the states of matter notebooking page on p. 33.

Hands-on Science

Coordinating Activities

- ✂ **Play with Matter** – You will need three balloons, water, and ice. Fill one balloon with ice, one balloon with water, and one with gas (air). Let the students explore each of the balloons and observe the differences. As they make their observations, ask them questions like:
- ? Which one floats the best?
 - ? Which one is easiest to control?
 - ? Which one has the most interesting shape?
- ✂ **(Optional) States of Matter Float** – Make a States of Matter Ice-cream Float with your students! You will need ice cream, root beer (or other type of soda), and a glass. Have the students add the solid, ice cream, first. Then, pour over the liquid, root beer, and watch the gas bubbles appear!

To-Do List

Essential

- ☐ Read the appropriate reading assignment.
- ☐ Define states of matter and volume.
- ☐ Complete the lapbook or notebook assignments.
- ☐ Do the “Play with Matter” activity.

Optional

- ☐ Get one or more of the library books to read.
- ☐ Fill out a lab report sheet (p. 41) for one of the activities.
- ☐ Do the “States of Matter Float” activity.

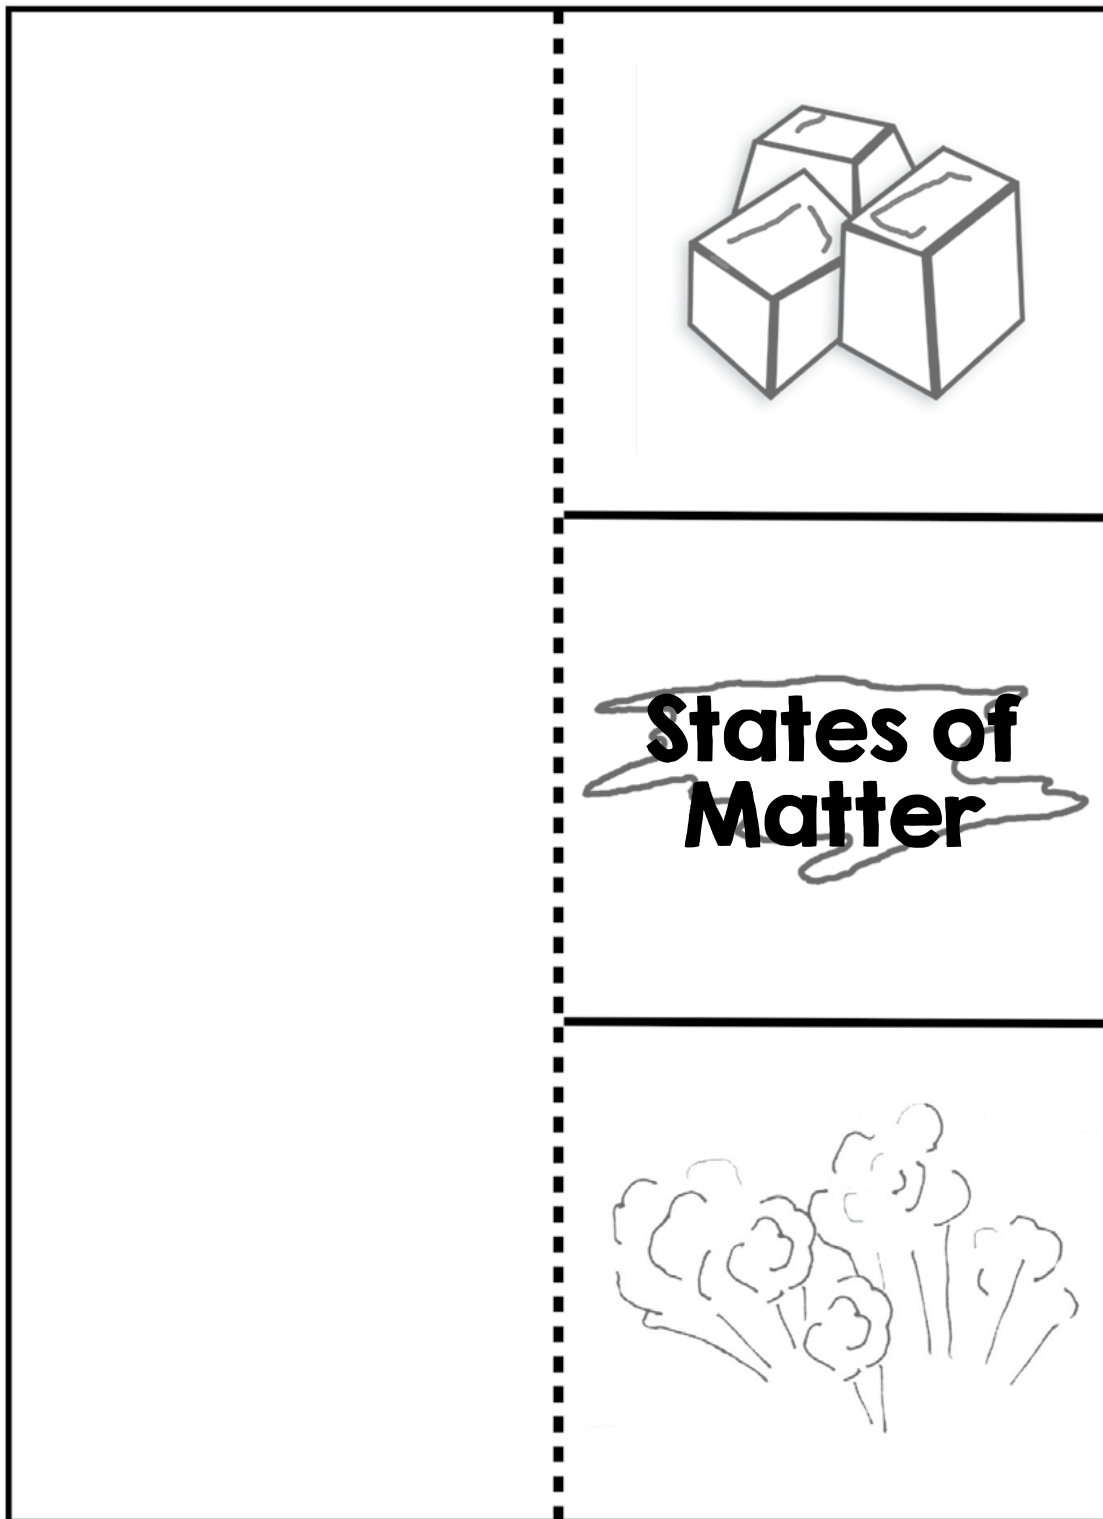

Student Lapbook Templates

Matter Lapbook

You will need two sheets of card stock or one file folder. If you are using card stock, begin by taping the two sheets together on the longest edge. The completed lapbook will look like this on the inside:

States of Matter Cut-flap Book

Instructions: Cut out along the solid lines and fold on the dashed lines.
